

## Stories of Digital Transformation

### Summary

Drivestream implemented an Oracle Financial Cloud solution – General Ledger, Accounts Payable, Accounts Receivables, Fixed Assets, Cash Management -- for this retail client. The client's operations support team was distributed across the U.S., Ireland, Japan, India, and Canada.

### About

The client is an online shopping retailer providing instant insider access to top contemporary designer labels at up significant discounts off retail.

### Challenges

- Global business and operations team
- Recently acquired
- Need to reduce application maintenance and infrastructure costs
- Schedule constraints imposed by peak shopping season

### Benefits Achieved

- Redesigned chart of accounts to align with parent company
- Streamlined and standardized business processes across global offices
- Consolidated multiple operating units to simplify Cloud deployment
- Developed country-specific training programs to facilitate adoption across multiple global locations

### Results

- Successful global project at client established a foundation for integration with parent company and encourages adoption by other parent entities
- Used Cloud migration as a catalyst to rethink and standardize on new business processes
- Improved business analytics
